Dear Parents,
Greetings of the day!

We believe in teaching students about responsibility, independence and self-regulation.

Give your children the chance to be responsible and independent individuals by allowing them to pack and carry their own bags to school.

The typical chaos of the morning makes it really difficult for students to focus on anything more than just getting out of the door on time. Due to the morning rush, it's probably the worst time for your child to pack bag for school.

Packing school bag the night before will compel your child to think through what is going on the following day, and then work backwards to ensure they have got everything they'll need. Homework done and ready to be handed in, swimming bag for swimming class, sneakers for sports, etc.

We humbly request you all to help the students pack their belongings to avoid any inconvenience of coming to school to give the same. It is difficult and inconvenient for school to accept the personal belongings of the students and hand over to the students within the given time frame. This practice should be discouraged and avoided at all costs.

Shradha Kanungo
